SUMMARY

As an Informatics graduate with hands-on experience in backend development and a strong track record in building and deploying web applications, I aim to utilize my skills in software development and problem solving. After successfully participating in a Google hackathon, I am building an app about the whole activity at the government agency KUA West Karawang, also experienced in the field of networking because I interned on campus in the networking department, I am excited to bring my technical expertise and innovative approach to a dynamic team where I can contribute to impactful and growing projects professionally.
