PROFESSIONAL SUMMARY

Fullstack Developer with 3+ years of experience building production web systems, internal tools and API integrations used by 2,000+ users. Built an HRIS with a custom fingerprint-device API that cut HR data processing from 20 hours to under 10 minutes per month. Experienced in end-to-end delivery (system design, backend development, CI/CD and cloud deployment), mainly with PHP/Laravel, Node.js and TypeScript.

TECHNICAL SKILLS

- **Languages & Frameworks:** PHP (Laravel 12, Livewire, CodeIgniter), Node.js, TypeScript, Vue.js, React.js, Python
- **Databases & Cloud:** MySQL (query optimization, schema design), PostgreSQL, SQLite, Firebase, Linux VPS, Nginx
- **DevOps & Security:** GitHub Actions (CI/CD), Git, CSRF/XSS/SQL injection prevention, secure browser lockdown, OpenCV-based proctoring
- **APIs & Tools:** REST, OpenAPI, SOAP/XML, HubSpot API, Gmail API, WhatsApp API, Cursor, Claude

WORK EXPERIENCE

Fullstack Developer Sep 2026 – Present

PT Andhika Teguhsetya, Karawang

- Refactored ~90% of AIMS, a legacy PHP native asset management system, resolving critical errors and stabilizing it for daily production use
- Enhanced existing features and shipped new modules, simplifying asset data input and control for Asset PIC and Admin teams

IT Staff (Fullstack Developer), Contract Jan 2026 – Sep 2026

IT Staff Intern Jun 2025 – Dec 2025

Akademi Komunitas Toyota Indonesia (AKTI), Karawang

- Led end-to-end development of an HRIS (attendance, payroll, overtime, leave) with Laravel 12 and Node.js, deployed to production on cloud VPS (hris.akti.ac.id)
- Engineered a custom Node.js API bridging fingerprint devices over SOAP/XML, reducing HR data processing time by ~99% (20 hours/month → under 10 minutes)
- Built a CBT exam platform for 2,000+ participants with OpenCV webcam monitoring and secure browser lockdown, eliminating 100% of licensing costs (exam.akti.ac.id)
- Led UAT for a Rp250M (~USD 15K) vendor-built Student Information System, mapping 72 menus and 252 sub-features, documenting bugs and driving fix cycles with the vendor (sakti.akti.ac.id)
- Led recovery of the academic information system after a critical database deletion: coordinated academic staff and the vendor across 13 recovery phases and reconstructed data manually where hosting backups had gaps
- Responded to a security incident (CyberPanel CVE-2024-51567) that injected malicious content into institutional websites: removed webshells, blocked attacker IPs, terminated an active attacker SSH session and reset credentials, remediated within one day
- Set up CI/CD with GitHub Actions and handled VPS deployments and database migrations, including the SLiMS e-library (elibrary.akti.ac.id)
- Planned migration of deployed systems from cloud VPS to an on-premise server, including a backup server proposal with cost analysis

Fullstack Developer, Freelance Jan 2023 – Present

Self-Employed, Remote

- Built JalanKu/Hibuzz, a student prospecting dashboard for Horizon University (TypeScript, Vue.js, HubSpot API): 1,800+ leads, ~90% school coverage in West Java & Jabodetabek, delivered solo in 3 weeks (jalanku.horizon.ac.id)
- Built a payroll and cooperative management app (CodeIgniter 3, MySQL) replacing an error-prone Excel workflow with payroll, member management, savings & loans and a full audit trail (payrolkopkarsejahtera.com)
- Built the KUA West Karawang web application end to end, from system analysis and data-structure design through deployment
- Developed a company profile and CCTV service website with product catalog, order inquiry and admin panel (CodeIgniter 3), delivered solo in 2 months (faztechcctv.com)

PROJECT

WaterSense: IoT Early Flood Detection System 2026

Team project, Horizon University | Laravel, Python, Raspberry Pi

- 2nd Place, Innovation Festival (Innofest) 2026, Faculty of Informatics
- Built the Laravel + Python backend that ingests real-time river-level and rainfall data from IoT sensors and triggers automated push and audio alerts to web and mobile dashboards; also coordinated the team

EDUCATION

Bachelor of Informatics, Horizon University, Karawang 2022 – Expected June 2027

- Thesis topic: computer-vision-based online exam proctoring system, using the CBT platform at exam.akti.ac.id as case study
- Coordinator, Web Club (C3) and Networking Club (Netify)

CERTIFICATIONS

- Database Programming with SQL, Oracle Academy, Distinction (2024)
- Dicoding: Project Management Basics • JavaScript Programming Basics • Front-End Web for Beginners

ACHIEVEMENTS

- 2nd Place, Innovation Festival (Innofest) 2026, Faculty of Informatics, Horizon University (WaterSense)
- 1st Winner, Best Video, IT Exhibition (KUA Simara Project); 2nd Place, Simara Project Presentation
- Participant, GDSC HackFest 2024 (Google Developer Student Clubs, sponsored by Telkom Indonesia)

LANGUAGES

Indonesian (Native) • English (Intermediate)
